**3:00 – 4:30 P.M.**  
**Campus Center Ballroom**

Co-sponsors: NJIT Technology and Society Forum Com-  
mittee, Albert Dorman Honors College, Sigma Xi

## TIMES ARE ALWAYS CHANGING

Two centuries ago, the philosopher and historian George Frederick Hegel wrote that history presents humankind with a continual progression of challenges that we must meet in order to make life increasingly better for an increasing number of people. Or to paraphrase Bob Dylan in the 20th century — the times are always changing.

In the first decade of the 21st century, we must respond to ample change and numerous challenges, ranging from economic inequity and the erosion of individual privacy to global warming. Once again, NJIT's Technology and Society Forum offers a venue for thoughtful examination of these and other critical issues. The new Forum Series brings to campus speakers who explore how we can respond creatively and effectively to the challenges that we

must face, with special emphasis on invoking the power of technology in new and imaginative ways.

One highlight of the 2008-2009 Series will be a panel presentation on the exponentially growing economic potential and social influence of wireless communications. While the capacity to be in touch “anytime, anywhere” has generated a sometimes overwhelming volume of information, it also gives people around the globe contact that fosters vital freedom of expression and mutual understanding.

For more information about the NJIT Technology and Society Forum, contact Jay Kappraff at [kappraff@adm.njit.edu](mailto:kappraff@adm.njit.edu) or 973-596-3490.

Technology and Society Forum presentations have been made possible by support from AT&T and Hewlett-Packard.

NJIT welcomes attendees from Essex County College, Rutgers-Newark and the University of Medicine and Dentistry of New Jersey.
